

# 中控室

The diagram illustrates a network setup in a control room. At the top left is a **Router** with two antennas and four ports, labeled **DHCP分配**. To its right is a **PC** consisting of a tower unit and a monitor. Below the Router is a **HUB** with two rows of eight ports each. Blue lines represent network connections: one from the Router to the HUB, one from the PC to the HUB, and another from the PC to the right edge of the frame. Labels **RJ45或光纖網路** are placed along these connection lines.
